Interview Summary

During the personal interview, applicant's representative showed to the Examiner a proposed Declaration, however the Examiner indicated that the declaration is not sufficient to overcome the instant prior art rejections (See paper #7). Applicants' representative, suggested to amend the independent claims to include the limitations of claims 8 and 9. Applicant's representative proposed to provide data in the form of a declaration indicating surprisingly unexpected results when using α and γ alumina as opposed to any other type of alumina as well as the ruthenium percentage composition. The Examiner agreed to consider the proposed data upon submission and indicated that further search will be required.
